Learn how to access and interpret Audit Events in EZproxy.
You can also go directly to the View Audit Events page by adding /audit to then end of your EZproxy server URL. On the View Audit Events page, you can:

- search audit files by event, IP, location, username, session, or other EZproxy config.txt directives
- click the date of the audit log you would like to view

If you choose to view audit events for a specific date, you will see a table similar to the following:

<table>
<thead>
<tr>
<th>DATE/TIME</th>
<th>EVENT</th>
<th>IP</th>
<th>USERNAME</th>
<th>SESSION</th>
<th>OTHER</th>
</tr>
</thead>
<tbody>
