When do holdings appear in FirstSearch databases?

Last updated: Mon, 02 Jul 2018 15:48:59 GMT

Applies to

• FirstSearch

Answer

The holdings information for individual bibliographic records is maintained in real time in the WorldCat database and appears as soon as holdings are added to records. Therefore, these holdings are up-to-date in these databases. These databases are Ebooks, GPO, SCIPIO, WorldCat, WorldCat Dissertations and all Group catalogs.

The holdings for articles in the article database are compiled from all journals with that ISSN in the WorldCat database.
