How do I set up automatic logon for FirstSearch?

Last updated: Thu, 09 May 2019 21:17:48 GMT

Applies to

• FirstSearch

Answer

• IP address recognition. OCLC Internet Protocol (IP) address recognition is easy to set up and maintain. You specify which IP addresses may use your FirstSearch accounts. You add links to FirstSearch on your Web pages. The links work only for users with an IP address that you specified. Complete instructions are available at [IP Address Recognition](https://help.oclc.org/Discovery_and_Reference/FirstSearch/Troubleshooting/How_do_I_set_up_automatic_logon_f...).
