Can I link from my website to individual FirstSearch databases?

Last updated: Fri, 05 Apr 2019 15:26:14 GMT

Applies to

- FirstSearch

Answer

Yes. Using automatic logon, you can point users to appropriate resources by creating links to specific databases or other screens within FirstSearch. For example, you can create a *WorldCat* link that takes users to a search screen for the WorldCat database, or an *Education* link that takes them to a database selection screen for the education topic area.
