Discover how to transliterate Latin text to non-Latin text from the MARC 21 editor in WorldShare Record Manager.

**Overview**

Record Manager supports the transliteration of Latin text to non-Latin text for all tags, subfields, and controlled links.

1. From the MARC 21 editor, select the field you want to transliterate.
2. From the Edit drop-down menu, select an alphabet from the Transliterate flyout menu. See available non-Latin alphabets below. You can also right-click the selected field to access the Transliterate flyout menu.

The transliterated text appears in a new field above the selected field. The new field and existing field are linked with a bracket.

**Available non-Latin alphabets**

- Arabic
- Belarusian
- Bulgarian
- Church Slavic
- Macedonian
- Russian
- Rusyn
- Serbian
- Ukranian
