How do I set up authentication from our library website to FirstSearch?

Last updated: Mon, 11 May 2020 12:30:31 GMT

**Objective**

- Patrons will be able to authenticate from a library's website to FirstSearch without logging in.

**Applies to**

- FirstSearch

**Steps**

Follow these steps to allow patrons to authenticate to FirstSearch directly from your library's website.

1. Go to [FirstSearch Admin](#) > **Authentication/Access** > **IP-Address Recognition** and add the library's website IP address.
2. Add this URL to your library's webpage: [https://firstsearch.oclc.org/fsipreferer](https://firstsearch.oclc.org/fsipreferer).
3. If you would like to create a direct link to a database using this structure, please use this URL structure: [https://firstsearch.oclc.org/fsipreferer&dbname=WorldCat&screen=basic](https://firstsearch.oclc.org/fsipreferer&dbname=WorldCat&screen=basic) or [https://firstsearch.oclc.org/fsipreferer&dbname=WorldCat&screen=advanced](https://firstsearch.oclc.org/fsipreferer&dbname=WorldCat&screen=advanced). You can determine database name by visiting the [FirstSearch databases](#) list.
4. Select the database you would like to create a link to and click on **Database details** > DATABASE NAME. This is the database name you will enter in the db=name section of the link above.

**Additional information**

More information can be found in [Create IP address recognition links to FirstSearch](#).
