OCLC Connexion crashes every time we export a record to our local system on any workstation

Last updated: Mon, 20 Jan 2020 14:29:59 GMT

Symptom

• Connexion client crashes after exporting records when using an OCLC Gateway export destination

Applies to

• Connexion client

Resolution

Connexion client may crash when taking action on records such as exporting if the Permanent Connection option is enabled. To disable this option, please follow these steps:

1. Log into Connexion client.
2. Click **Tools > Options > Export.**
3. Highlight your export destination and click **Edit.**
4. If Permanent Connection is selected, uncheck the box and click **OK.**

If this option is not checked or if this does not fix the issue, please contact **OCLC Support.**
