Discover how to delete an individual local bibliographic data record or all local bibliographic data records in WorldShare Record Manager.

Note: See Delete WorldCat holdings and associated local information for information on how to delete WorldCat holdings and associated local information (LHRs and LBDs) from up to 10,000 records.

Delete an individual local bibliographic data record

1. From the MARC 21 record editor, scroll down to the LBD accordion.
2. From the LBD accordion, click the local bibliographic data record that you want to delete.
3. Click Delete.

Delete all local bibliographic data records

1. From the MARC 21 record editor, scroll down to the LBD accordion.
2. From the LBD accordion, click Delete All.
