Symptom

- Site wants the Description to show up in the ChangeUserInformation.html rather than the NVTGC which does not tell the patron much.

Applies to

- ILLiad

Resolution

1. In the NVTGG field on the ChangeUserInformation.html, it is showing this code:

   `<#OPTION name="custom" groupname="NVTGC" selectedValue="<#PARAM name=NVTGC>"` />

2. Change the code to this:

   `<#OPTION name="custom" groupname="NVTGC" selectedValue="<#PARAM name=NVTGC>" defaultValue="" defaultName=""/>`

Additional information

I found that the codes were different in the Registration Page and the Change User Information page. When I updated the code on my Web Server, it showed me the name ILL Office instead of ILL. So this fixes the issue.
