WorldCat Discovery release notes, September 2018

Last updated: Wed, 29 Jul 2020 14:14:07 GMT

Introduction

The following release notes are for the **September 20, 2018** release of WorldCat Discovery.

**WorldCat Discovery September release highlights**

Libraries can configure custom library search boxes in minutes within Service Configuration, and users can cite additional formats (theses/dissertations and eJournals/eMagazines) in all supported citation styles. Additionally, more metadata is sent from OCLC’s A to Z list and Integrated Link Resolver to Get It Now.

**Include Request ID with problem reports**

When reporting an issue with WorldCat Discovery, it is extremely helpful to include the **Request ID**. The Request ID is found at the bottom of the screen on which the issue occurred. Including this information allows us to directly trace what happened on the request we are troubleshooting.

New features and enhancements

**Create unique search boxes in minutes with the Search Box Generator**

The search box generator makes it easy and convenient for your library to build a search box HTML snippet to host on
your library homepages, LibGuides, and other sites. These search boxes can be embedded in any webpage to meet users where they typically look for information. Search boxes can be updated to include colors and text to reflect your library’s brand.

WorldCat Discovery generates the HTML code as you use the generator tool to set search box options for databases, material formats, one or multiple search tabs, search results defaults such as library scope, search index and sort. You can also use the tool to customize the text and select colors for your search box. As you select options in the generator tool, your changes immediately appear in the Search Box Preview and Code section, so you can see the impact your changes make to the tabs, labels, colors, etc. You can even search in the preview search box to make sure the search works exactly as you expect and make additional changes to the HTML and inline CSS as needed. Once you have completed all the selections you wish to include in your custom search box, the information can be copied to the clipboard to then add to your website.

The search box generator is located in a new section of OCLC Service Configuration, at Service Configuration -> My WorldCat.org -> Search Box Generator:
Here is an example showing customized text, tabs, and colors:

In addition to these exciting ways for you to customize your WorldCat Discovery search box, we plan to enhance the generator tool based on your feedback from a recent survey on search box configurations. Additional features we are considering include peer-reviewed and full-text content options under articles and journals, subformat options when choosing formats such as Books (i.e. ebook, print, etc.) and Videos (i.e. DVD, Blu-ray, etc.), save your options, and icons to complement the search action and format tabs.

We appreciate the response to the search box survey and it is our intent to align additional work on the search box generator tool to survey results.

**Generate citations for Thesis/Dissertations and eJournal/eMagazine**

In addition to existing citation options, users can now additionally generate citations for Thesis/Dissertations & eJournal/eMagazine in all supported citation styles.

After selecting the citation style, users can copy and paste citations automatically formatted in the appropriate style:
Additional fields added to Get It Now

Users that have configured Get It Now as a fulfillment option in their knowledge base to display in their A to Z list and integrated link resolver now benefit from additional data sent to Get It Now.

OCLC’s A to Z list and integrated link resolver send the following additional metadata fields to Get It Now when available from an incoming citation or search:

- Author: &author=
- DOI: &contentID=
- Start page: &startPage
- End page: &endPage
- Partner field: &partner=oclcr
New content

This is a list of new databases added to WorldCat Discovery, WorldCat Local and WorldCat.org since our last update.

You can enable these databases as search options in the Licensed Content and Databases module of the OCLC Service Configuration site. Please remember that your library must have a valid subscription to these databases in order to enable them.

Available in WorldCat Discovery, WorldCat Local, and WorldCat.org

From Mediengruppe Deutscher Apotheker Verlag

Verlag Österreich – Publisher of legal information in Austria covering content in the areas of public law, criminal law, civil law, and corporate law for science, justice, and legal professional practice.
