Discover how to set search preferences to enable, disable, and sort the data types, scopes, and indexes that appear when you perform basic and advanced searches in WorldShare Record Manager. Use search preferences to enable, disable, and sort the data types, scopes, and indexes that appear when you search for records. Search preferences also allow you to set a preference for the editor in which you wish to view records.

Note: After setting preferences in Searching - Advanced, Searching - Basic, or Working with Records:

- Click **Reset Form** to restore original default settings.
- Click **Discard Page Changes** to discard the changes you made and retain your previous settings. A confirmation dialog displays to confirm the discardment. Click **Discard** to confirm and discard your changes.

### Set search preferences for advanced searches

**Searching - Advanced accordion - Image**

1. In the left navigation, click **User Preferences**.
2. From the User Preferences screen, click **Searching - Advanced**.
3. For One Search Result Only, enable **Open record for editing** to bypass the results list and go directly to the record editor when a search returns one result.
4. For Language(s) of Cataloging, select the **language(s)** used for the description of the item.
5. For Source of Cataloging, select the code used to designate the institution that is primarily responsible for the content of the catalog record.
   ◦ Any (default)
   ◦ DLC (Library of Congress)

6. For Search Scope(s) for Bibliographic Records:
   a. Select which search scopes appear in the Scope drop-down list. By default, all search scopes are selected.
      ▪ To disable a search scope, deselect it in the Display column.
   b. Select the default search scope.
      ▪ All WorldCat (default)
      ▪ My Library Holdings
   c. Determine the order in which the search scopes appear in the Scope drop-down list.
      ▪ Click the up arrow to move a search scope up and the down arrow to move a search scope down in the list.

7. For the first enabled search scope, click the search scope name and then select the following:
   a. For Default Sorting Method, select how your search results are sorted.

   Available default sorting methods
   - Relevance (default)
   - Author (A-Z)
   - Title (A-Z)
   - Date (Newest First)
   - Date (Oldest First)
   - Library Count (Highest First)
   - Library Count (Lowest First)

   b. For Index Display Order:
      1. Select which indexes appear in the Index drop-down list. By default, all indexes are selected.
         ▪ To disable an index, deselect it in the Display column.
      2. Select the default index by enabling the Default radio button for the index. By default, Keyword is selected.
      3. Determine the order in which the indexes appear in the Index drop-down list.
         ▪ Click the up arrow to move an index up and the down arrow to move an index down in the list.
      4. Click Back to Search Scopes and repeat steps 1-3 for the remaining search scope(s).

8. Click Save.

Set search preferences for basic searches

1. In the left navigation, click User Preferences.
2. From the User Preferences screen, click Searching - Basic.

Note: After setting preferences in Data Type Options, Authority Records, Bibliographic Records, Local Bibliographic
Data Records, and Local Holdings Records, click **Reset Form** to restore original default settings.

## Set data type preferences

**Searching - Basic accordion: Data Type Options - Image**

![Data Type Options](image)

1. **Click Data Type Options.**
2. **Select which data types** appear in the Data Type drop-down list. By default, all data types are selected.
   - To disable a data type, deselect it in the Display column.
3. **Select the default data type** by enabling the Default radio button for the data type. By default, Bibliographic Record is selected.
4. **Determine the order in which the data types appear** in the Data Type drop-down list.
   - Click the **up arrow** to move a data type up and the **down arrow** to move a data type down in the list.
5. **Click Save.**
Set authority record preferences

1. Click the **Authority Records** tab.
2. For One Search Result Only, enable **Open record for editing** to bypass the results list and go directly to the record editor when a search returns one result.
3. For Diacritics, enable **Enter search terms with diacritics** to enter diacritic characters when performing a basic or expert search.
4. For Authority References, enable **Show See references in search results, Show See Also references in search results**, and/or **Show Heading Linking Entries in search results** to view See references, See Also references, and/or 7xx links in authority record search result lists if present in the records.
5. For Search Scope(s) for Authority Records:
   a. Select which **search scopes** appear in the Scope drop-down list. By default, all search scopes are selected.
      - To disable a search scope, deselect it in the Display column.
   b. Select the **default search scope** by enabling the Default radio button for the search scope. By default, GND Authorities is selected.
   c. Determine the order in which the search scopes appear in the Scope drop-down list.
