Why does my full text link not resolve to the article for my publish ahead of print journals?

Last updated: Fri, 17 May 2019 13:17:52 GMT

Symptom

- A full-text link does not resolve correctly to the article. This can happen to any publish ahead of print journals that are released early.

Applies to

- WorldShare Collection Manager

Resolution

Your links for any publish ahead of print journals will not resolve correctly, as OCLC is unable to provide OpenURL linking to publish ahead of print articles.

- This is due to the lack of citation information that is necessary for article level linking
- Once the article has been published and the citation is updated, the link will be established at the article level
