I am seeing a new status in ILLiad in the OCLC status field that says supplied

Last updated: Fri, 17 Apr 2020 14:16:48 GMT

Symptom

• The OCLC Status field within an ILLiad request is now showing new statuses.

Applies to

• ILLiad.

Resolution

Because of the changes in the ILL Statuses in Tipasa and WorldShare, ILLiad will now see new statuses in the OCLC Status field. Visit the ILL Statuses page, then view the statuses that show Closed (Supplied), or Closed (Expired). The words in Parenthesis are what ILLiad sees. Supplied or Expired are examples. After thirty days from when the request was completed, the request will show as "Record Not found" in the OCLC Status in ILLiad.
