Link to catalogue enrichment data

Learn how to configure book cover art and other catalogue enrichment in Folio using OLIB Web. You can configure Folio to link to a catalogue enrichment service in the Title hitlist and Title details screens. For example Syndetic Solutions (from Bowker in U.K, Europe and Middle East).

Catalogue enrichment services provide additional information about a book or other media, such as a cover page image, an abstract, an extract (e.g. from the 1st chapter) and so on.

The link to a catalogue enrichment service is basically a URL comprising:

- the service supplier's base URL
- your account code with the service supplier
- the title's ISBN

Subscribe to the service

First take out a subscription to the service. For further information and trial access to Syndetics see

http://proquest.syndetics.com/

Configure the service in OLIB

1. In the OPAC menu go to Configuration Settings and use the Folio Configuration Settings by Setting search.
2. Search for active_caten (in the gno_startup config block), set Value = “Y” and ensure that Include is set to Yes.
3. Search for t_hitlist (the enrichlnk setting for the catalogue enrichment service link) and ensure that Include is set to Yes.

<td>1</td>
<td>gno_startup</td>
<td>syndplus_client</td>
<td>&quot;XXXXXX&quot;</td>
<td>1</td>
<td>0</td>
<td>Y</td>
</tr>
</tbody>
</table>

5. For `gno_startup` and `g_title_details` change the `syndplus_clientcode` from "XXXXX" to your library's unique account code, (retain quotes " ").

6. Set `syndetics_url1` to include the correct service url, e.g. http://syndetics.com/index.aspx?isbn= (Syndetics is provided by default).

7. Set `syndetics_url2` to include the part of the url following the ISBN -"/index.html&type=vw12&client=myaccountcode"

For the link to Syndetics' service, this part includes your unique account code supplied by Syndetics service. This should be added to the syndetics_url2 value to replace XXXX

8. Set `syndetics_url3` to include the suffix to the base URL to retrieve the book jacket gif to display as the link on the
hitlist and details screens. Syndetics is provided by default - "/sc.gif"

Optionally also include Syndetics Captions: change the "/sc.gif" to "/sc.gif&client=XXXXX&showCaptionBelow=t&caption=Click+for+more+info&bgColor=grey"

(where XXXXX is your Syndetics account code).

9. Set **syndetics_alt**. This should display the text for the catalogue enrichment data link, e.g. *Show catalogue enrichment data* is displayed to the user by default. Set **Include=Y**.

### Changes in Folio

All changes take effect in Folio immediately:

Summary
Getting Things Done : The Art of Stress-Free Productivity

In today’s world, yesterday’s methods just don’t work. In Getting Things Done, veteran coach and management consultant David Allen shares the breakthrough methods for stress-free performance that he has introduced to tens of thousands of people across the country. Allen’s premise is simple: our productivity is directly proportional to our ability to relax. Only when our minds are clear and our thoughts are organized can we achieve effective productivity and unleash our creative potential. In Getting Things Done Allen shows how to: apply the “do it, delegate it, defer it, drop it” rule to get your in-box to empty; reassess goals and stay focused in changing situations; plan projects as well as get them unstuck; overcome feelings of confusion, anxiety, and being overwhelmed; and feel fine about what you’re not doing. From core principles to proven tricks, Getting Things Done can transform the way you work, showing you how to pick up the pace without wearing yourself down.
