When searching within Google Scholar, we are able to see links to items held by our institution, however, these links never work, why?

Last updated: Tue, 04 Dec 2018 15:11:30 GMT

Applies to

- WorldShare Collection Manager
- A-Z list and OpenURL resolver

Answer

Verify your settings in Google Scholar are pointing to the newest version of the OCLC A-Z list and OpenURL resolver. You can find this setting by going to WorldShare Management Services > Collection Manager > Proxy and Authentication > Google Scholar. The URL should end with /atoztitles/link. You can get your library's URL by signing in the Service Configuration > My WorldCat.org > A-Z list and OCLC Link Resolver.

Additional information
