Why won't my logo display properly on WorldCat Discovery?

Symptom

- Your logo appears as a broken link in WorldCat Discovery.

Applies to

- WorldCat Discovery

Resolution

WorldCat Discovery only accepts images using the SSL protocol so you must provide a link that uses https:// and not http://. For more information on updating your logo, please visit the Logo Settings help page.

Additional information

OCLC does not provide SSL server space to use. Libraries must acquire that from their local IT departments.
