How do I insert line breaks in the privacy policy hover text without it being in double line spacing?

Last updated: Thu, 15 Oct 2020 13:04:38 GMT

Applies to

- OLIB Folio

Answer

If you want to insert a line break in the hover text for your privacy policy footer link in Folio a carriage return or the break `<br/>` will result in double line spacing. If you would prefer single line spacing you should include the hex value for the line break (\#013;) in `displayFooterText` rather than a carriage return.

The following example text would be used in the `value` field for the `displayFooterText` setting and incorporates line breaks with single line spacing.

Local elements of the text eg. your privacy policy url should be amended as required.

```
"Powered by <STRONG>OLIB</STRONG>, &copy; <a target='new' href='http://www.oclc.org'>OCLC (UK) Ltd</a> 2013-2018 <A HREF='https://myopac.myorg.org/folio/?sobj=8814&source=foliofooter'' target='new' TITLE='This institution processes personal information for the purpose of providing this service. Please review the Privacy Policy for additional information.'>Privacy Policy</A>"
```
