I have made changes to my MARC format. How do I apply this change to my existing records?

Last updated: Mon, 29 Oct 2018 16:36:18 GMT

Applies to

• OLIB Web (all versions)

Answer

To do this you will need to clear the output cache:

1. Go to Data Exchange Reference Data > Output Formats and search for your output format.
2. Tick the box next to your output format in the hitlist.
3. Click the Other Actions drop-down menu and select Clear Output Cache.
4. Changes made to your output format should now apply to all existing records.
