How do I update Collection Manager with our OpenAthens proxy?

Last updated: Thu, 01 Sep 2022 15:15:05 GMT

Applies to

- WorldShare Collection Manager

Answer

Navigate to **Institution Settings > Proxy and Authentication > Choose EZproxy**. You can enter the base URL from OpenAthens there, even though it says EZproxy.

Update your IP addresses with the OpenAthens server IP address. You will need to contact OpenAthens to get this IP. Once you have it, enter it in your libraries Service Configuration as a WorldCat Discovery IP address.

Review your WorldShare Collection Manager collections to ensure they are configured to integrate with OpenAthens.
