1. Create a Data Sync Collection

Contact OCLC Support to create a Data Sync Collection in OLIB

When you want to create a Data Sync Collection in WorldShare Collection Manager, contact OCLC Support. OCLC will arrange a WebEx session with you to work through the Data Sync Collection configuration.

**During the WebEx:**

- Make a note of the Collection ID for subsequent addition to your WorldCat data sync **Output Format** record in OLIB
- Request the Web Service Key for the WorldCat Metadata API process
