EZproxy will run on any 64 bit Server.
Last updated: Wed, 01 Apr 2020 21:18:52 GMT

Applies to

- EZproxy and 64 bit Servers.

Resolution

OCLC recommends using EZproxy 7.X when running EZproxy on a 64-bit server. If you are running earlier versions of EZproxy, it is possible to run these versions on 64-bit Windows versions by verifying the WOW64 library is installed. On 64-bit Linux servers, the appropriate libraries will also need to be installed to run 32-bit binaries if running versions of EZproxy prior to version 7.x.
