Reports are accessible by all users, but not all users can see all reports. What you can see depends on your permissions level (see Permissions Levels). When you first click on the Reports tab, you will see links to Librarian, Institution, Group, and QP Usage.

- Everyone who logs in can see the Librarian and the QP Usage levels of reports.
- If you are an Institution Administrator, you can see the Institution level, as well.
- If you are a Group Administrator, you can see all levels.

QuestionPoint has two types of reports: Activity Statistics and Counts of Current Data.

- **Activity Statistics** include data that are collected as activities occur. Thus, when a librarian clicks on the Send Answer button, the statistic for Answers Sent is increased by 1. These statistics will never change; the data are written to a separate file every night, kept indefinitely, and displayed when called by the software.
- The **Counts of Current Data** type is an on-demand count of a data element in the database that underlies QuestionPoint. Depending on the data element requested, this count can change from day to day and time to time. For example, Descriptive Codes counts change every time a librarian assigns a descriptive code to a transaction. Other data elements—Sessions by Authorization is one—will continually increment as work is done.

Another important difference between Activity Statistics and Counts of Current Data is that the latter numbers link to transactions that make up the count (where applicable). So if you see that one of your librarians accepted 10 chat sessions last month (Reports>>Institution or Group>>Counts of Current Data–Reports of Sessions by Authorization), you can click 10 to see those transcripts.

---

**Activity Statistics (report type)**

**DEFINITION**

The type of QuestionPoint report that notes an activity when it happens. Each time certain buttons, tabs, or links are clicked a statistic is generated and saved. Each action is then rolled up into hourly, daily, and monthly statistics for that particular activity. These reports are available for all years back to 2002.

**TIME ZONE**

Eastern (GMT-5; during Daylight Savings GMT-4)
### Activity Statistics

Activity Statistics are not reflected in reports until the day after the activity. At the monthly level, the current month can only be viewed by looking at Daily statistics.

### Permissions Level

Activity Statistics are available to all permissions levels: Librarian, and Institution, Group.

- Number of Profiles (field)
- Number of Librarian Authorizations (field)
- Number of Cooperative Groups (field)
- Number of Active Global Knowledge Base Records (field)
- Reused extant KB records in QP (field)
- Times extant KB records were reused (field)

### Answers Sent (field)

**Definition**

Number of times answers were sent to questions.

**Notes**

This is the number of times that messages were sent to patrons from a Full Question record in QuestionPoint, using the Answer button. Multiple answers might be sent for a single question. **Only answers sent after a live session has ended are counted here for chat sessions; live chat exchanges are not counted.**

Base Management Environment (BME) (definition)

**DEFINITION**
Every institution with a QuestionPoint account has access to a Base Management Environment. Institutions that joined QuestionPoint as a group have access to the same BME. In addition to provide for the software for managing receipt and answering of questions, administration, profiling, and reporting, a BME provides a local knowledge base for use by the institution or group and one local knowledge base. See also [Subscription Group (definition)](#).

Browses against Knowledge Base (Global) (field)

**DEFINITION**
Number of times librarians browsed the Global Knowledge Base.

**NOTES**
Before October 2004, another field, Searches against Knowledge Base: Global, contained the number of searches and browses. Beginning in October 2004, this field was added to contain the number of browses.

### Descriptive Codes (report)

**DEFINITION**
The number of transactions in your *current* (90 days) database assigned each of your institution's codes.

**NOTES**
A descriptive code is a way of categorizing your transactions. Any single transaction may have been assigned up to 4 codes. Descriptive Codes are defined and set up in QuestionPoint by your institution.

**PERMISSIONS LEVEL**
Librarian (Ask Administrator), Institution Administrator, Group Administrator

**REPORT TYPE**
Counts of Current Data

**FREQUENCY**
Activity reflected in real time. User sets date range to report on. Only 90 days available.

**FIELDS**
List of codes with occurrence of each.

### E-mailed Webform (section)

**DEFINITION**
This counts the number of questions in the database received in your library via web form.

**NOTES**
This report is most useful when you want to review the transactions in the count using the hotlink. For most other statistics for e-mail webform activity, or if transaction review is not your focus, use reports Activity Statistics.

**IN THESE REPORTS**
- Reports of Sessions (report)
- Reports of Sessions by Authorization (report)

Knowledge Base Service (section)

The Knowledge Base service section of a report contains statistics on any of the activities listed below (Fields) for which there was related activity. Appears as a separate section when reporting on a single librarian, institution, or group. Individual fields are presented as options in a drop-down menu when reporting on a list of institutions or librarians.

NOTES

If there was no activity related to a particular field, the field does not appear in the report. If none of the fields had related activity, the section does not appear in the report. In the "Total times KB records were reused" field, the count represents the number of times the KB Forward button or the Copy button was clicked. It is not a count of re-used records. It is possible the re-used records no longer exist in the knowledge base.

### Number of Chat Sessions Requested (field)

#### DEFINITION
Number of chat sessions requested by patrons when someone was monitoring chat.
### Number of Chat Sessions Requested: After Hours (field)

**DEFINITION**
Number of chat sessions requested by patrons when no one was monitoring chat.

**NOTES**
QuestionPoint began to provide the data for this field in August 2004. Sessions that were indicated “practice” (either by using the practice chat form or by using the Practice Resolution Code) were not counted in these statistics.

**FREQUENCY**
Monthly, Daily, Hourly back to 2002

**IN THIS SECTION**
Chat Service (section)

**IN THESE REPORTS**
Institution Report
Report by Institution List (report)
Report by Single Subscription Group (report)

### Number of Chat Sessions Requested via Qwidget (field)

**DEFINITION**
Number of chat sessions requested by patrons using the Qwidget feature.

**NOTES**
QuestionPoint began to provide the data for this new field in March 2008. Sessions that were indicated “practice” (either by using the practice chat form or by using the Practice Resolution Code) were not counted...
Number of Chat Sessions Routed to Coverage Group (field) (No longer used)

**DEFINITION**
Before 2008, these were chat sessions requested by your patrons that were answered by another library.

**NOTES**
Only libraries that used the original, HTML version of chat would see these statistics. These statistics were tracked for users of virtual groups that were formed to provide chat coverage.

**FREQUENCY**

Number of Librarian Authorizations (field)

**DEFINITION**
Total number of librarian accounts in QuestionPoint.

**NOTES**
Each month a new, total count is displayed. You can see how much the membership grew each month by subtracting last month’s total from this month’s total.

**FREQUENCY**
Accumulates monthly

**IN THIS SECTION**
Administration Service (section)

**IN THESE REPORTS**
QP Usage Report

Number of Patron Authorizations (field)

**DEFINITION**
Total number of patron accounts in QuestionPoint.
NOTES

QuestionPoint automatically assigns a patron account for each unique patron e-mail address provided with a question or chat session. If a single patron asked multiple questions and used different e-mail addresses for some of the questions, the patron has multiple accounts. Libraries may turn off the notification of account information that goes to the patron, but the account still exists and is counted.

You can see how new patrons each month contacted a library via QuestionPoint by subtracting last month's total from this month's total.

FREQUENCY

Accumulates monthly

### Number of Questions by Patron ID (report)

<table>
<thead>
<tr>
<th>DEFINITION</th>
<th>This is the number of QP-facilitated questions each patron associated with your library (or a library in your group) has asked. This includes both chat and e-mail sessions.</th>
</tr>
</thead>
<tbody>
<tr>
<td>NOTES</td>
<td>Every e-mail address used to contact a librarian via QuestionPoint is assigned an ID number. The ID number then becomes the way QP recognizes a returning patron. If a patron has used multiple e-mail addresses, each one will have a patron ID. The association between ID number and any other patron identification is not retained for display. The report is in two parts: Current 90-day data is at the top; archived data (transcripts older than 90 days) is the second section. This report is best used to see how many repeat patrons your library (or group) had and how many new patrons. This is a cumulative count, so to see counts on a monthly basis, take a count on the same day, same time each month and subtract the previous month’s count from the new one.</td>
</tr>
</tbody>
</table>

### Our Sessions with Others' Patrons: BME's (cell/column)

| DEFINITION | For each institution (Reports of Sessions), the number of chat sessions your librarians answered for patrons of other institutions in your group.  
For each authorization (Reports of Sessions by |

---

**Counts of Current Data (report type)**  
Monthly cumulative counts back to 2002  
Patron ID  
Number of Questions
Authorization), the number of chat sessions a particular librarian answered for patrons of other institutions in your group.

Each row represents an institution (Reports of Sessions). For institutions in a group, the Our Sessions with Others’ Patrons: BME’s cell in the final Totals row represents all sessions that group institutions answered for one another.

Each row represents an authorization, or librarian (Reports of Sessions by Authorization). This cell in the final Totals row represents all sessions your librarians answered for other institutions in the group.

These include sessions requested via a Qwidget. IMPORTANT: This count includes work your library performed for another BME library after a chat session was ended. This may be follow-up work claimed from the Shared Follow Up folder, if you use that feature, and it may be transcripts referred to you.

DATE RANGE
Any range within last 90 days. Default is entire 90 days.

IN THIS SECTION

IN THESE REPORTS
Reports of Sessions (report)
Reports of Sessions by Authorization (report)

Our Sessions with Others’ Patrons: Outside BME (cell/column)

For each institution (Reports of Sessions), the number of chat sessions your librarians answered for patrons of other institutions not in your group.

DEFINITION
For each authorization, or librarian (Reports of Sessions by Authorization), the number of chat sessions a particular librarian answered for patrons of other institutions not in your group.

NOTES
These include Qwidget sessions

Each row represents an institution (Reports of Sessions). For institutions in a group, the Our Sessions with Others’ Patrons: Outside BME cell in the final Totals row represents all sessions that your group’s
institutions answered for patrons of institutions outside the group.

Each row represents an authorization, or librarian (Reports of Sessions by Authorization). The Our Sessions with Others’ Patrons: Outside BME cell in the final Totals row represents all sessions that your institution’s librarians answered for patrons of institutions outside the group.

**DATE RANGE**

Any range within last 90 days. Default is entire 90 days.

Our Sessions with Others’ Patrons: Total (cell/column)

**DEFINITION**

This represents the total number of sessions your librarians answered for patrons other than your own. The number is the sum of the BME’s and Outside BME cells under Our Sessions with Others’ Patrons.

**NOTES**

These include sessions requested via a Qwidget.

**DATE RANGE**

Any range within last 90 days. Default is entire 90 days.

**IN THIS SECTION**

Counts of Current Data (report type)

**IN THESE REPORTS**

Reports of Sessions (report)
Reports of Sessions by Authorization (report)
Permissions Levels (definition)

**DEFINITION**

A permissions level depends on your account type. For Librarians, the level depends on the permissions assigned by your Institution Administrator. The level determines what reports you can see, as well as various other feature access within QuestionPoint. Each level can see all reports for that level and for lower levels.

**LEVELS**

**Librarian:** This level can see only Activity Statistics. They can see overall institution statistics and statistics for their own account.

**Librarian, Ask Administrator:** This level can see overall institution statistics, as well as statistics for their own account. It can also see Descriptive and Resolution Codes and Sessions reports in the Counts of Current Data.

**Institution Administrator:** This level can see everything the Librarian and Ask Administrator see, as well as reports on all librarians in the institution.

**Group Administrator:** This level can see everything the Librarian, Ask Administrator, and Institution Administrator see, as well as reports on all institutions in the group and all librarians in any institution.

**Virtual Group:** Any institution administrator who has created a virtual group can get reports for that group.

Profile Contact Information

See Reports of Profile Contact Information (report).

Profile Information

See Reports of Profile Information (report).

Profile Service (section)

**DEFINITION**

This section displays statistics on searches in the...
Profile database. It appears as a separate section when reporting on a single librarian, institution, or group. The individual field is presented as an option when reporting on a list of institutions or librarians.

NOTES

If there was no search activity in the Profile module, the section does not appear in the report.

### Questions Assigned to Librarian (field)

**DEFINITION**

Number of times that questions were assigned to a librarian or administrator.

A question is assigned when it is:

- Answered by a librarian or administrator
- Assigned to a librarian or administrator by an administrator
- Claimed by a librarian

**NOTES**

A question can be assigned to only one librarian or administrator at a time, at a library. However, a question may be assigned to more than one librarian or administrator at a library during the life of the question.

Questions Received from Virtual Partner (field)

**DEFINITION**
Number of questions received by a library via referral from another library in a virtual group to which it belongs. The referring library will have used the Refer to Partner (Cooperative) option.

**NOTES**
The statistic will be written using this label if (1) the referring library is in the receiving library’s subscription group; (2) the subscription group has been made “public,” and (3) the referring library selected the receiving library from the Refer to Partner (Cooperative Groups) option.

Questions (Total) Received (field)

**DEFINITION**
Total of all questions received via web form, referral, direct entry, or e-mail coverage. This statistic is the total of the following fields:

- Questions Received via Patron Form
- Questions Received from Global Network via Global Network;
- Questions Received from Subscription Partner;
- Questions Received from Virtual Partner
- Questions Received via Direct Entry
- Questions Received via Coverage Group

**NOTES**
This statistic does not include chat requests.

**FREQUENCY**
Monthly, Daily, and Hourly back to 2002

**IN THIS SECTION**
Ask Service (section)
### Questions Received via Coverage Group (field)

**DEFINITION**
Number of questions received by a library while covering for other libraries in its web-form cooperative coverage group.

**FREQUENCY**
Monthly, Daily, and Hourly back to 2003

**NOTES**
The Add Question feature lets libraries enter questions asked at the reference desk, by telephone, or in an e-mail message. This statistic tracks how many times that feature is used.

**FREQUENCY**
Monthly, Daily, and Hourly back to 2002

### Questions Received via Direct Entry (field)

**DEFINITION**
Number of questions that were entered into QuestionPoint via the Add Question feature in the Ask module.

**NOTES**
The Add Question feature lets libraries enter questions asked at the reference desk, by telephone, or in an e-mail message. This statistic tracks how many times that feature is used.

**FREQUENCY**
Monthly, Daily, and Hourly back to 2002
### Questions Received via Patron Form (field)

<table>
<thead>
<tr>
<th>DEFINITION</th>
<th>Number of questions received via a library's QuestionPoint question form on the Web.</th>
</tr>
</thead>
<tbody>
<tr>

### Records Added to Database Automatically (Global) (field)

**DEFINITION**
Number of question-and-answer records submitted to the Global Knowledge Base automatically by the QuestionPoint system when the questions are closed.

**NOTES**
Records are submitted only; an editor must activate them for indexing and searching.

**FREQUENCY**
Monthly and Daily back to 2002

### Records Added to Database Manually (Global) (field)

**DEFINITION**
Number of question-and-answer records manually submitted or added to the Global Knowledge Base.

**NOTES**
Records are manually submitted or added by a librarian or administrator from a question list or Full Question page in the Ask module or from the Add New Record page in the Knowledge Base module. These are submittals -- only librarians with global edit permissions can activate a record for indexing and searching.

**FREQUENCY**
Monthly and Daily back to 2002

- Time zone
- Do you observe daylight savings in your area?
- Profile status (within in your group or BME)

### Reports of Sessions (report)

**DEFINITION**

The count of a group’s chat sessions and email or walk-up transactions, from the last 90 days. Reports one institution per line. Shows the number of sessions with the institution’s patrons (whether handled by the institution, by another institution in the group, or by an institution outside the group) and the number of sessions the institution’s librarians handled for patrons of other institutions, inside and outside the group.

All institution totals are rolled into group totals in the...
NOTES

This report is probably most useful to members of the 24/7 Cooperative and other chat cooperatives. All transactions, including Deleted and Practice, are included here. Numbers hotlink to the actual transaction.

PERMISSIONS LEVEL

Ask Administrator; Institution Administrator; Group Administrator

REPORT TYPE

Counts of Current Data (report type)

FREQUENCY

You set the date range, within approximately the last 90 days, that you want to report on. These statistics are updated in real time.

Reports of Sessions by Authorization (report)

**DEFINITION**

The count of an institution’s chat sessions and email or walk-up transactions, from the last 90 days. Reports one authorization, or librarian, per line. Shows the number of sessions with the institution’s patrons (whether handled by the librarian, by librarians from another institution in the group, or by librarians from an institution outside the group) and the number of sessions the institution’s librarians handled for patrons of other institutions, inside and outside the group.

All librarian totals are rolled into institution totals in the last line.

**NOTES**

This report is probably most useful to members of the 24/7 Cooperative and other chat cooperatives. All transactions, including Deleted and Practice, are included here. Numbers hotlink to the actual transactions.

**PERMISSIONS LEVEL**

Ask Administrator, Institution Administrator. Group Administrators can see statistics for only the librarians in the institution associated with the Group Admin account.

**REPORT TYPE**

Counts of Current Data (report type)

**FREQUENCY**

You set the date range, within approximately the last 90 days, that you want to report on. These statistics are updated in real time.

<td>You set the date range, within approximately the last 90 days, that you want to report on. These statistics are updated in real time.</td>
</tr>
</tbody>
</table>
| **CODES**        | **Answered.** The question was answered and requires no further action. The transcript is filed in the Answered folder.  
**Followup By Me.** The chat librarian intends to do more work after the session ends. The transcript is filed in the New folder of the chat librarian’s open questions.  
**Followup By Patron’s Library.** The patron’s library is expected to do additional work on this question or make the final decision as to its disposition. The transcript is filed in the New folder of the patron’s library’s open questions. If the patron’s library is part of a group that utilizes Shared Followup, the transcript will also appear there.  
**Lost Call.** Used to indicate a patron who left the session or who was otherwise lost and who did not leave an e-mail address for follow up.  
**Practice.** The session was a practice session. No further action is required. |
### Reused extant KB records in QP (field)

<table>
<thead>
<tr>
<th>DEFINITION</th>
<th>Cumulative total of the number of Global and local knowledge base records that have been forwarded to patrons or copied to the message text box on the Answer page (Ask module) to answer questions.</th>
</tr>
</thead>
<tbody>
<tr>
<td>NOTES</td>
<td>If a record is copied or forwarded multiple times, the record is counted only once in this field. A record is counted whether or not it is saved as a draft before the answer is sent to the patron. If a record is deleted from a knowledge base, it is removed from the total—thus, the “extant” in the field label.</td>
</tr>
<tr>
<td>FREQUENCY</td>
<td>This is a cumulative count that has been reported monthly since 2004.</td>
</tr>
</tbody>
</table>

### Searches against Knowledge Base: Global (field)

<table>
<thead>
<tr>
<th>DEFINITION</th>
<th>Number of searches performed in the Global Knowledge Base.</th>
</tr>
</thead>
<tbody>
<tr>
<td>NOTES</td>
<td>Before October 2004, this field contained the number of searches and browses. Beginning in October 2004, it contains only the number of searches. Another field, Browses against Knowledge Base: Global, was added to contain the number of browses.</td>
</tr>
<tr>
<td>FREQUENCY</td>
<td>Monthly and Daily back to 2004</td>
</tr>
</tbody>
</table>
Searches against Knowledge Base: Local (field)

**DEFINITION**
Number of searches performed in your local knowledge base.

**NOTES**
Before October 2004, this field contained the number of searches and browses. Beginning in October 2004, it contains only the number of searches. Another field, Browses against Knowledge Base: Local, was added to contain the number of browses.

**FREQUENCY**
Monthly and Daily back to 2002

Searches against Profile Database (field)

**DEFINITION**
Number of searches performed in the profiles of libraries.

**NOTES**
Profile searches can be performed in the Profile module by administrators of subscription groups or administrators of full subscribers that are not subscription group members.

**FREQUENCY**
Monthly and Daily back to 2002
### Sessions by Authorization

### Sessions report

### Sessions with Our Patrons (section)

#### DEFINITION

The number of chat sessions requested by patrons who used your library’s chat form or Qwidget. This number is further broken into who answered the patron’s request: the library; another library in the group, a library in the 24/7 Cooperative but not in the viewing library’s group.

#### NOTES

Each row represents an institution. For institutions in a group, the Totals row represents all institutions.

### Subscription Group (definition)

<table>
<thead>
<tr>
<th>DEFINITION</th>
<th>A group of institutions that subscribe to QuestionPoint together.</th>
</tr>
</thead>
<tbody>
<tr>
<td>NOTES</td>
<td>A Subscription Group (sometimes referred to as a BME—Base Management Environment) has an administrative account that controls various settings for all members of the group. A Subscription Group has a knowledge base (local KB) that all members share and, usually, at least one chat queue that all members can offer to their patrons and monitor. Most reports are available at the Subscription Group level, meaning the group administrator can get statistics for the groups as a whole, for each institution in the group, and for each librarian in each institution.</td>
</tr>
</tbody>
</table>

Printed: Sat, 11 Apr 2020 19:34:38 GMT
### Text Messages Answers Sent (field)

| DEFINITION | Number of answers sent in response to questions received as text messages. |
| NOTES | Since multiple answers can be sent for a single question, this number is often greater than the number of questions received as text messages. |
| FREQUENCY | Monthly, Daily, and Hourly back to 2010 |
| IN THIS SECTION | Ask Service (section) |

### Text Messages Received (field)

| DEFINITION | Number of questions received as text messages. |
| NOTES | Must also subscribe to a texting service that is integrated with QuestionPoint. |
| FREQUENCY | Monthly, Daily, and Hourly back to 2010 |
| IN THIS SECTION | Ask Service (section) |
| IN THESE REPORTS | Institution Report, Report by Institution List (report), Report by Single Subscription Group (report) |

### Times extant KB records were reused (field)

| DEFINITION | Cumulative total of the number of times that Global and local knowledge base records have been forwarded to a patron or copied to the message box on the Answer page (Ask module) to answer questions. |
| NOTES | If a record is used (forwarded or copied) multiple times, |
each use is counted in this field.

A use is counted whether or not the record is saved as a draft before the answer is sent to the patron.

If a record is deleted from a knowledge base, its reuses are removed from the total. (Thus, the term “extant.”)

QuestionPoint began to record this statistic in February 2004.

**Total Chats (cell/column)**

---

**DEFINITION**

The total number of chat sessions either coming into this library (Our Patrons) or into other libraries but handled by our librarians (Our Sessions with Others’ Patrons).

(Reports by Sessions) Each row represents an institution in the group.

Caution: Group administrators should remember that in the final Total row, this cell overstates the total number of chat sessions handled because sessions counted under Our Patrons as picked up by another institution in the group will be counted for that other institution in their Our Sessions with Others’ Patrons: BME’s cell.

---

Virtual Group (definition)

DEFINITION
A group that has been created by a QuestionPoint institution in the Administration module. This can be a subscription group that has been opened to other institutions outside the group for referral purposes. It can also be a completely new group made up of various single institutions not in the same subscription group. Virtual groups can be used for referring questions to one another or for covering one another’s email questions.

NOTES
A virtual group has access to a local knowledge base if the creator of the group is a subscription group administrator. In this case, the KB is the local KB of the subscription group.

Virtual group statistics appear as line items within the Ask Service section of Activity Reports: Questions Received from/Referred to Virtual Partner, and Questions Received from/Referred to Coverage Group.

Unlike Subscription Group administrators, creators of virtual groups cannot see activity at the individual institution level.

Virtual Group (permissions level)
See Permissions Levels (definition).
