How do I map the data from the 024 field into an 856 field?

Last updated: Thu, 06 Dec 2018 19:20:33 GMT

Applies to

- Digital Collection Gateway

Answer

1. Edit the Metadata Map
   ◦ Go to the Collection list screen, or click Home
   ◦ Select the collection
   ◦ Click Edit under the Metadata Map heading
2. Select More > Show unmapped fields from the top right menu section.
3. Click on MARC View at the top center of the record
4. Click inside the yellow box around the 024 field data.
5. When the Edit Mapping pop up displays, click the arrow for the dropdown menu.
6. Click on the View Online link.
7. Select from the dropdown, the field that represents the item URL. (view online URLs automatically appear in the 856 field)
8. Resync the collection
   ◦ Click Approve Map & Sync on the top right of the screen

Additional information

After syncing is complete, the mapping changes will have changed across the entire collection.
