I recently activated a WorldShare knowledge base collection, but did not receive all of the records I expected to. Is there an error with this collection?

Last updated: Tue, 22 Jan 2019 19:40:26 GMT

Applies to
- WorldShare Collection Manager

Answer
In WorldShare Collection Manager, records that do not have corresponding OCNs (OCLC numbers) will not output a MARC record for that title.

If a title in the collection does not have an OCN then a cataloger can match the OCLC number to the title and enter it in the "Override OCN" field.
