Is there a way to be sure the Amlib backups are reliable?

Last updated: Fri, 28 Dec 2018 06:24:51 GMT

Applies to

• Amlib maintenance
• Amlib backup and restore
• SQL databases

Answer

The best way to ensure that the backups are reliable:

1. Perform an SQL Backup on the Amlib live databases (usually AMLIB, AMCAT, AMLOCAL, AMSTATS, AMWEB).
2. Using this SQL Backup of the Amlib databases, restore the backups to a set of test databases (Usually TELIB, TECAT, TELocal, TESTATS, TEWEB).
3. Log onto the Amlib Test database to ensure all is well.

Additional information

• For detailed instructions on performing and restoring the databases, find the information on the Amlib Content Portal > Technical Documentation
• An important step detailed in the documentation is to fix the security logins (map user schema) within the SQL databases
