Why are my Hosted EZproxy HTML pages showing https://protect-us.mimecast.com in the links

Last updated: Mon, 01 Jul 2019 17:13:23 GMT

Symptom

- Custom Hosted EZproxy HTML pages are showing https://protect-us.mimecast.com in the links

Applies to

- Hosted EZproxy all versions

Resolution

1. Contact the member back and ask them to Zip the HTML files and resend them.
2. Verify the links in the custom HTML pages are not showing https://protect-us.mimecast.com as part of the links

Additional information

These changes are being made by our email security and need to be updated with the correct links just in case members are bookmarking the links.
