Why do I see a second copy prefix in my LHR display in Record Manager?

Last updated: Mon, 20 May 2019 12:28:57 GMT

Symptom

- You see a second "c." in the LHR display in your Record Manager search results or LHR display.

Applies to

- Record Manager

Resolution

Your Local Holdings Record has the "c." inside the 852 $t tag, but you also have a Prefix entered into the User Preferences > Working with Records > LHRs > Prefix text box or the User Preferences > Searching - Basic > LHRs > Prefix text box. Erase the prefix from the text box and the duplication should go away.
