Languages where script is supported in Connexion client and browser

Last updated: Tue, 19 Mar 2019 13:51:23 GMT

Applies to

- Connexion client and browser

Answer

Both Connexion interfaces offer complete cataloging functions. Each also offers unique features. See a chart that compares interface functionality between the client and browser.

For example, the client provides support for cataloging using the following non-Latin scripts:

- Arabic
- Armenian
- Bengali
- Chinese
- Cyrillic
- Devanagari
- Ethiopic
- Greek
- Hebrew
- Japanese
- Korean
- Syriac
- Tamil
- Thai
