Copyright Clearance Center is requiring TLS 1.2 as of March 1, 2019 for ILLiad

Last updated: Fri, 17 Apr 2020 14:03:37 GMT

Symptom

- When using ILLiad for Copyright Clearance Center, ILLiad Client will have to use TLS 1.2. This is for any ILLiad computer that is using any version below 9.0.1.0. The error message when in Copyright Clearance will say, "The underlying connection was closed...."

Applies to

- ILLiad

Resolution

ATLAS has posted a solution on [The CCC's new TLS 1.2 Security Protocol Requirements](https://help.oclc.org/Resource_Sharing/ILLiad/Troubleshooting/Copyright_Clearance_Center_is_requiring_TLS_1.2...). Here is the link for the [Performing a Registry Change for ILLiad Client or Server to Enable TLS 1.2](https://help.oclc.org/Resource_Sharing/ILLiad/Troubleshooting/Copyright_Clearance_Center_is_requiring_TLS_1.2...) on the local computer. For the ILLiad Client, no update on the registry on the Web Server is necessary. To learn more about the TLS security updates at OCLC, [click here](https://help.oclc.org/Resource_Sharing/ILLiad/Troubleshooting/Copyright_Clearance_Center_is_requiring_TLS_1.2...).
