In ILLiad, is there a way to add in additional queues that we can mark items "In Transit" and "Check Out" in WebCirc?

**Last updated:** Thu, 07 Feb 2019 19:43:07 GMT

**Symptom**

- You have special queues you set up and you want to be able to Mark items In Transit or to "Check Out."

**Applies to**

- ILLiad

**Resolution**

You can have those special queues, but you would have to route them to the proper queues to mark the items "In Transit" and "Check Out." This is built into the system. You can find the information in the Using WebCirc documentation.
