Metadata in my repository is contributed by several different organizations. How can these organizations be given attribution in WorldCat?

(last updated: Fri, 22 Feb 2019 16:08:15 GMT)

You can assign a single, unique OCLC symbol for each collection in each repository you manage. Prior to performing a sync for the first time, you can apply an OCLC symbol to a collection in the Collection Profile section. You cannot assign multiple OCLC symbols to a particular collection. The Collection Profile defaults to the OCLC symbol associated with your repository’s Gateway key.
