When I am viewing my digital records in the WorldCat Digital Collection Gateway, the number of records in a collection sometimes changes.

Last updated: Fri, 22 Feb 2019 16:10:05 GMT

After logging into the Gateway, you will begin to edit the metadata map beginning with the first record in a collection. In the top right navigation, the Gateway indicates that a certain number of records are in the collection. Until the Gateway has retrieved all the records in the collection, that number may change as you advance from one record to the next.
