How do I edit the indicators in the 856 field?

Last updated: Thu, 21 May 2020 14:49:33 GMT

Applies to

- Digital Collection Gateway

Answer

The Digital Collection Gateway selects the first Identifier that contains a URL and makes it the default value for the resolution URL in MARC 856 $u.$o

If your resolution URL is in a field other than the first Identifier field, you will have to map it separately.

1. Use the Edit metadata map function.
2. Choose the WorldCat.org Item View.
3. Click on the yellow box in the Find a copy online section, and map the URL
