Introduction

The March 2019 release features a follow up to last month’s Service Configuration updates as well as improvements to the WorldCat Discovery interface that streamline the look and feel of search results detailed views. These changes will bring focus and continuity to the content of search results. Updates were a result of user feedback and gathered from the WorldCat Discovery Community Center.

As always, WorldCat Discovery continues to correct small issues as they are found, and in this release users will see fixes for missing eLinks on Course Reserves, IIIF images displaying in WorldCat Discovery, and more.

Include Request ID with problem reports

When reporting an issue with WorldCat Discovery, it is extremely helpful to include the Request ID. The Request ID is found at the bottom of the screen on which the issue occurred. Including this information allows us to directly trace what happened on the request we are troubleshooting.

New features and enhancements
View service configuration updates to the Full Text OpenURL Resolvers (outgoing requests) module in real time

Last month we reduced the amount of time librarians spent waiting for Service Configuration settings changes to display in the WorldCat Discovery interface. This change did not affect the Full Text Open URL Resolvers (outgoing requests) module. In this release users will also see changes made in this module apply in real time to their WorldCat Discovery interface. Immediate viewing of changes made in Service Configuration for WorldCat Discovery will now be available in the following modules:

- WorldCat Discovery and WorldCat Local
  - User Interface Options
  - Relevancy and Scoping
  - Full Text OpenURL Resolvers (outgoing requests)
  - Place Hold/Request Buttons
  - OPAC Statuses, Locations and Circulation Policies
  - Holding Codes & Shelving Location Message
  - Local and Enhanced Content
  - Full Text and Open Access Links
  - ILS Support and Maintenance
  - Google Analytics (WorldCat Discovery only)
  - A – Z List and OCLC Link Resolver
  - Search Box Generator
- Metasearch Content
  - Default Databases and Licensed Content

User interface updates

Several interface updates demonstrate OCLC’s ongoing commitment to improvements that provide a better search experience for WorldCat Discovery users. Better alignment of selected filters, more informative text, and modernized default book icons will help users focus on information in search results rather than on their display.

Improved alignment of selected filters, text, and institution hover colors

When users select facets and filters to narrow their search, the text will now center on the “X” displayed within the Selected filters section. Users will also see their institution’s hover text display on these filters.
New default cover art image for books

Users will now see a new image displayed for books when a cover art is unavailable. This image will display in brief results, detailed pages, and in Course Reserves in the WorldCat Discovery interface.
Improved description of Editions & Formats accordion on detailed WorldCat Discovery views

In December, most accordions in WorldCat Discovery were enhanced to indicate to users that more information was located within these sections. In this release we have updated Editions & Formats text to reflect the call-to-action language present on other accordions. Text on the Editions & Formats accordion will now display as “Explore Editions & Formats” in detailed views of WorldCat Discovery.
Links from brief search results will match updated language of Editions & Formats accordion on detailed views

To help users understand the relationship between the content on brief results and detailed views of search results, we have updated the language of the Editions & Formats link to reflect the text on the detailed view Editions & Formats accordion. The brief result link will change from “View all editions & formats” to “Explore all editions & formats.”
Bug fixes

IIIF images using URLs that contain https will now display in WorldCat Discovery

When hosted CONTENTdm images use a secured URL starting with https, WorldCat Discovery will now display the image within the IIIF viewer.

Automatically update databases for saved searches when a database is no longer available to an institution

Saved searches WorldCat Discovery will automatically search only databases that are currently available to an institution. Previously, when saved searches attempted to search a database that was no longer enabled, users would encounter an error message.

Expert searches using Boolean operators in non-English languages display correctly

When using Boolean operators in a search and selecting a non-English language from the WorldCat Discovery interface, users will no longer see the “+” symbol display in addition to the Boolean operators in the search box.

Date of meeting or treaty signing title metadata will now display in WorldCat Discovery

Users searching WorldCat Discovery will now see MARC field 111 for Main entry—Meeting Name, subfield d for Date of
Known Issues

IIIF images using URLs that contain http are not displaying in WorldCat Discovery

When hosted CONTENTdm images use an unsecured URL starting with http, WorldCat Discovery is not displaying the image within the IIIF viewer. A fix is planned for this functionality later this spring.

New content

This is a list of new databases added to WorldCat Discovery, WorldCat Local and WorldCat.org since our last update.

You can enable these databases as search options in the Licensed Content and Databases module of the OCLC Service Configuration site. Please remember that your library must have a valid subscription to these databases in order to enable them.

Available in WorldCat Discovery, WorldCat Local and WorldCat.org

From Alexander Street

- **Academic Video Online: Premium – All Titles** — Contains video titles spanning wide subject areas including anthropology, business, counseling, film, health, history, music, and more.

- **Academic Video Online: Premium - Australia** — Contains video titles spanning wide subject areas including
anthropology, business, counseling, film, health, history, music, and more.

**Academic Video Online: Premium - Canada** — Contains video titles spanning wide subject areas including anthropology, business, counseling, film, health, history, music, and more.

**Academic Video Online: Premium - Japan** — Contains video titles spanning wide subject areas including anthropology, business, counseling, film, health, history, music, and more.

**Academic Video Online: Premium – Outside North America** — Contains video titles spanning wide subject areas including anthropology, business, counseling, film, health, history, music, and more.

**Academic Video Online: Premium – United States** — Contains video titles spanning wide subject areas including anthropology, business, counseling, film, health, history, music, and more.

**American Film Scripts Online** — Contains scripts and accurate, authorized versions of copyrighted screenplays.

**American History in Video - All Titles** — Contains contemporaneous video from the 1890s to the 1980s including newsreels and documentaries.

**American History in Video - Australia** — Contains contemporaneous video from the 1890s to the 1980s including newsreels and documentaries.

**American History in Video - Canada** — Contains contemporaneous video from the 1890s to the 1980s including newsreels and documentaries.

**American History in Video - China** — Contains contemporaneous video from the 1890s to the 1980s including newsreels and documentaries.

**American History in Video – Outside North America** — Contains contemporaneous video from the 1890s to the 1980s including newsreels and documentaries.

**American History in Video – United States** — Contains contemporaneous video from the 1890s to the 1980s including newsreels and documentaries.
