Can Digby support check digits in barcodes?

Last updated: Thu, 28 Mar 2019 15:07:52 GMT

Applies to

- WorldShare Circulation

Answer

No. When Digby scans barcodes via camera and they have a check digit such as 365200183480/, the scan will not be successful. Digby currently cannot be set to ignore these check digits.

Additional information

If used with a [bluetooth scanner](https://help.oclc.org/Library_Management/WorldShare_Circulation/Troubleshooting/Can_Digby_support_check_digits_in_barcodes), the scanner can be programmed to remove the check digit which will allow Digby to scan the barcode.
