Why are some library names hyperlinked in the Libraries Worldwide section while others are not?

Last updated: Fri, 22 Mar 2019 17:30:37 GMT

Applies to
- WorldCat Discovery
- WorldCat.org

Answer
This section of the record is configured by the specific library in the Service Configuration > WorldCat Registry > Online Catalog section of the record. Libraries are responsible for updating their specific library site's deep link to their local catalog. More information can be found here regarding these deep links.

Additional information
For additional information about setting up a deep link to your local library catalog please see Configure links to your online catalog.
