Our subscription to an automated DDA (Demand-Driven Acquisition) collection ends soon what do I need to do?

Symptom
Automated DDA collection ends soon, what do we need to do?

Applies to
• WorldShare Collection Manager

Resolution
Let the DDA collection vendor know the date you want the subscription to end:

1. The vendor will stop sending the automated holdings feeds for the DDA collections.
2. The Perpetual collection will remain intact when the automatic feed stops and your MARC Records remain unchanged.
3. After the subscription has ended, please verify in activity history that we did not load any holdings to ensure the vendor correctly stopped your automatic feed.
4. Then deselect the DDA collection.

If the automatic feed did not end, please call or email OCLC Support and we will investigate further.
