- WorldShare

Answer

Obtain login credentials and URL

Check with your tech services staff. If your library does not already have the logon and URL, fill out this form.

Use your primary OCLC symbol. For most libraries, this is a 3 character code, such as ABC. Newer libraries may have 5-letter codes. (The form provides a link where you can find your code). You will not need your Registry ID for this step if you have your symbol, however, you may want to retrieve and make a note of it now as you'll need it if you choose to implement step three.

OCLC will respond with a URL and instructions to complete setting up your account with a username and password.
