I accidentally hit "Yes" on an article request before I dropped the Article Exchange Article

Last updated: Mon, 03 Jun 2019 19:33:32 GMT

Symptom

• I accidentally hit "Yes" on an article request before I dropped the Article Exchange article.

Applies to

• Article Exchange

Resolution

I accidentally hit "Yes" on an article request before I dropped the Article Exchange Article.

1. Go ahead and Drop the Article and you should soon see the URL and Password from Article Exchange on the upper right of the request.

2. The library should also be able to see the URL and Password but not until the article is dropped.

3. Send an email letting them know the article is ready and include the URL and password to let them know.
