How can I see in ILLiad the items that show up in WorldShare ILL as In Transit?

Last updated: Mon, 22 Jul 2019 20:35:50 GMT

Symptom

- Because ILLiad does not update the Transaction Status when an Item is shipped, you want to know how to find out what items are shipped

Applies to

- ILLiad

Resolution

To find out what items that are shipped you do the following:

2. Look for the OCLC Status of Shipped.
3. When you open that Queue, you will see all the items that are currently Shipped on OCLC.
