Can I use an Hewlett-Packard 5P or 6P Laser printer?

Last updated: Tue, 30 Apr 2019 18:22:54 GMT

Applies to

- Cataloging Label Program

Answer

For Hewlett-Packard 5 and 6 Laser printers, install the HP III, HP4, or earlier printer driver. Do not set it as the default driver, as it affects printing from other Windows applications. Select the printer driver from the Print Options window in the OCLC Cataloging Label Program. This should solve problems printing labels using SL4 format.
