How do I turn on IFM for ILLiad?

Last updated: Fri, 07 Aug 2020 17:59:07 GMT

Symptom

• You want to start using IFM, and you want to know how to get it working with ILLiad

Applies to

• ILLiad

Resolution

To have IFM working, you need to do the following:

1. IFMSupport in the customization Manager needs to be updated to Yes.
2. All of your Borrowing and Lending Constant Data Records have to have IFM Support or ILL Fee Management box checked.

Open up the ILLiad Clients again and they should work with all new Borrowing and Lending requests.
