How do we migrate our ILLiad Server to a new server if we are self-hosted?

Last updated: Fri, 30 Sep 2022 18:36:20 GMT

**Symptom**

- How to migrate an ILLiad server for self-hosted sites

**Applies to**

- ILLiad

**Resolution**

The following document details how to migrate the server:

1. See the [Running the ILLiad Server Installation Program](#) documentation.
2. Then the [Migrate an ILLiad Database](#) documentation.
3. Self-hosted sites will need to contact [OCLC Support](#) about the credentials needed to get the ILLiad Server installation program.
4. Make sure to follow the instructions for the [Hardware and Software Requirements for Version 9.1](#) if upgrading to 9.1.
5. To upgrade to 9.2, follow the [Hardware and Software Requirements for Version 9.2](#).
6. Make sure to correctly set up the [Server Configuration and Permissions](#).
7. Make sure the `c:\inetpub\wwwroot\ILLiad` folder has the Users group with the Read, Read&Execute, and List folder contents.
8. If you are self-hosted and want to be hosted by OCLC, contact [OCLC Support](#).
