Why do some of my patrons have a Cleared field showing "New?"

Last updated: Thu, 16 Jan 2020 14:52:40 GMT

Applies to

• ILLiad

Answer

After a patron authenticated, their Username is created, and the Cleared Value shows as NEW. Until the patron completes the registration form, that is all you will see in ILLiad. If the patron goes off to somewhere else and logs on again, the patron will see the Registration form again. There is no way to stop a patron from not completing registration. There is nothing you can do about these accounts except delete them if you want through the ILLiad Database Manager.
