Hosted EZproxy Log access

Last updated: Mon, 12 Jul 2021 19:30:02 GMT

Symptom

- Access hosted EZproxy log files

Applies to

- EZproxy (hosted) all versions

Resolution

Short introduction or instructions to follow these steps:

1. URL link: https://<yourdomainname>.idm.oclc.org/public/admin.htm
2. Login using your "nav" credentials - these are provided to you when the hosted system is initially set up. These are used to access your hosted EZproxy log files.
3. Once authenticated, there are (2) two hyperlinks: EZproxy Administration & Log Listing
4. Select "Log Listing"
5. Listed here are the log files that have been captured by EZproxy, this is considered "raw data". All can be downloaded for review and analysis.
6. Files ending with a .gz extension are considered compressed format and must be unzipped.
