What are database-only collections?

Last updated: Mon, 24 Jun 2019 15:27:58 GMT

Applies to

- WorldShare Collection Manager
- WorldShare Acquisitions
- WorldShare License Manager

Answer

Database-only collections are used primarily by WorldShare Acquisitions and WorldShare License Manager libraries when they need to acquire collections or associate licenses with collections that do not have a defined list of titles. For example, a library might [create a database-only collection](https://help.oclc.org/Metadata_Services/WorldShare_Collection_Manager/Troubleshooting/What_are_database-o...) for the Oxford English Dictionary website.
