On our ILLiad Hosted site, why is the time stamp of requests coming from the ILLiad Web Pages showing for the Eastern Time zone United States rather than our time zone?

Applies to

- ILLiad

Answer

We made a decision that all the OCLC ILLiad Hosted Databases would be based upon a single time zone which is where OCLC Corporate headquarters resides and that is the Eastern United States. So you will see the timestamp of any requests that come in as the Eastern United States time zone.
