The OCLC Cataloging Express service provides an easy-to-use Web interface for copy cataloging. Copy cataloging is selecting an existing bibliographic record from WorldCat®, adding local data to it, and then adding the record to your local catalog.

- **Get started**
  - No image available
  - Find information about the CatExpress interface, process, and hardware and software requirements. Discover how to set browser and export options.
    - Overview
    - Action buttons
    - Customize the system interface
    - Hardware and software requirements
    - Home page and navigation bar
    - Quick reference
    - Set export options
    - Set options

- **Search and catalog**
  - No image available
  - Learn how to perform basic and advanced searches as well as how to add local data and multiple location fields, print labels, and export records.
    - Add local data
    - Add multiple Location (852) fields
    - Advanced search
    - Basic search
    - Cataloging basics
    - Export records
    - Fix errors
    - Print labels
    - Search results
