There is no link appearing on the WorldCat records we harvested in Digital Collection Gateway.

Last updated: Tue, 23 Jul 2019 12:50:29 GMT

Symptom

- We set up a collection to be harvested in Digital Collection Gateway
- The records were correctly harvested, but no link appears on the records

Applies to

- Digital Collection Gateway

Resolution

The links need to be set up to map from the records inside your repository

1. Log into Digital Collection Gateway
2. Go to the Collection list screen
3. Under the Metadata map column, select edit for the collection you would like to map
4. The WorldCat item view allows the selection of the View Online button for mapping
5. Click on the View Online button and select the URL from your repository record
