I am an author. Why does WorldCat not display a library which owns my work?

Applies to

- WorldCat.org
- WorldCat Discovery

Answer

Holdings may not appear for a library if they are not an OCLC member library, have cataloged a different edition of the title, or have chosen to not catalog or maintain their holdings in WorldCat. If you believe a library’s holdings should be reflected in WorldCat, please contact the owning library to request that they catalog the item accordingly so that this reflection is shown.

Please note that OCLC does not control these holdings, and only reflects what is submitted from the member library. A library may choose to not reflect their holdings, which is a decision made at the library's discretion.
